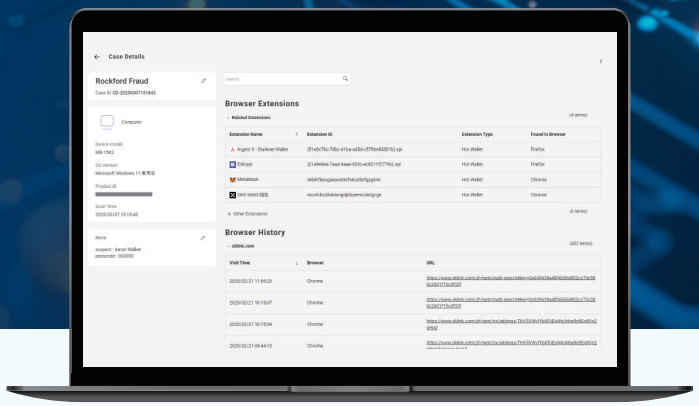
CT Wallet Scan

Crypto Evidence Scanning Tool

CT Wallet Scan is a high-efficiency tool designed for law enforcement, enabling rapid detection of cryptocurrency-related data while significantly reducing manual inspection time.



Application Quick Scan

Scan cryptocurrency-related apps from the mobile phone within minutes.

Wallet Address Extraction

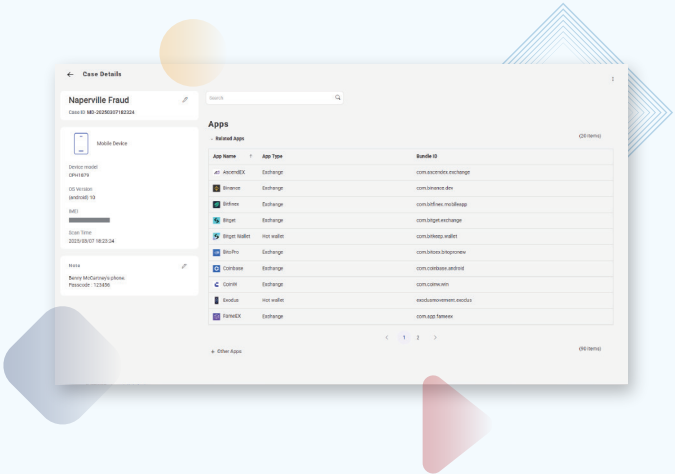
Identify wallet addresses in communication apps and files.

Private Key and Recovery Phrase Identification

Scan for any cryptocurrency wallet private keys and recovery phrases that appear in communication apps and files.

Keyword Detection

Customize keyword libraries for precise scanning and rapid retrieval of target content, significantly enhancing investigative efficiency.

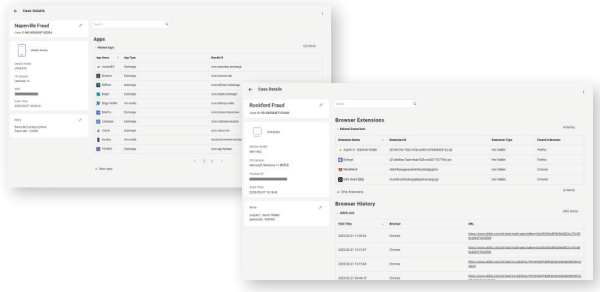


> "CT Wallet Scan' s user-friendly design empowers investigators, streamlines processes, accelerates investigations, and strengthens efforts against crypto-related cases."

BCS dedicate ourselves to create client-focus solutions based on innovation, integrity, and sustainability

CT Wallet Scan

Scan, Detect, Investigate



Onsite Application Scanning: Crypto-Related App Identified

CT Wallet Scan automates app inspection of suspect' s mobile phones, quickly identifying crypto-related apps, reducing inspection time, accelerating investigations process and digital asset seizure.

Forensic Image File Analysis: Wallet Addresses Retrieval

CT Wallet Scan streamlines time-consuming process, enabling rapid data retrieval allowing law enforcement to find crypto evidence faster and expedite cases through mobile forensics integration.
