

Blockchain Witness

Reputation On the Line?
Blockchain Puts All to Calm...!

Cyberbullies All Exposed,
Everyone Glad & Composed!

**Fight back against fake news,
rumors and slanders**

Preserve evidence from communication software and social networks, often as primary scene of investigation.

Everyday evidence collection made easy

Using Blockchain Witness, the age of online justice has finally arrived.

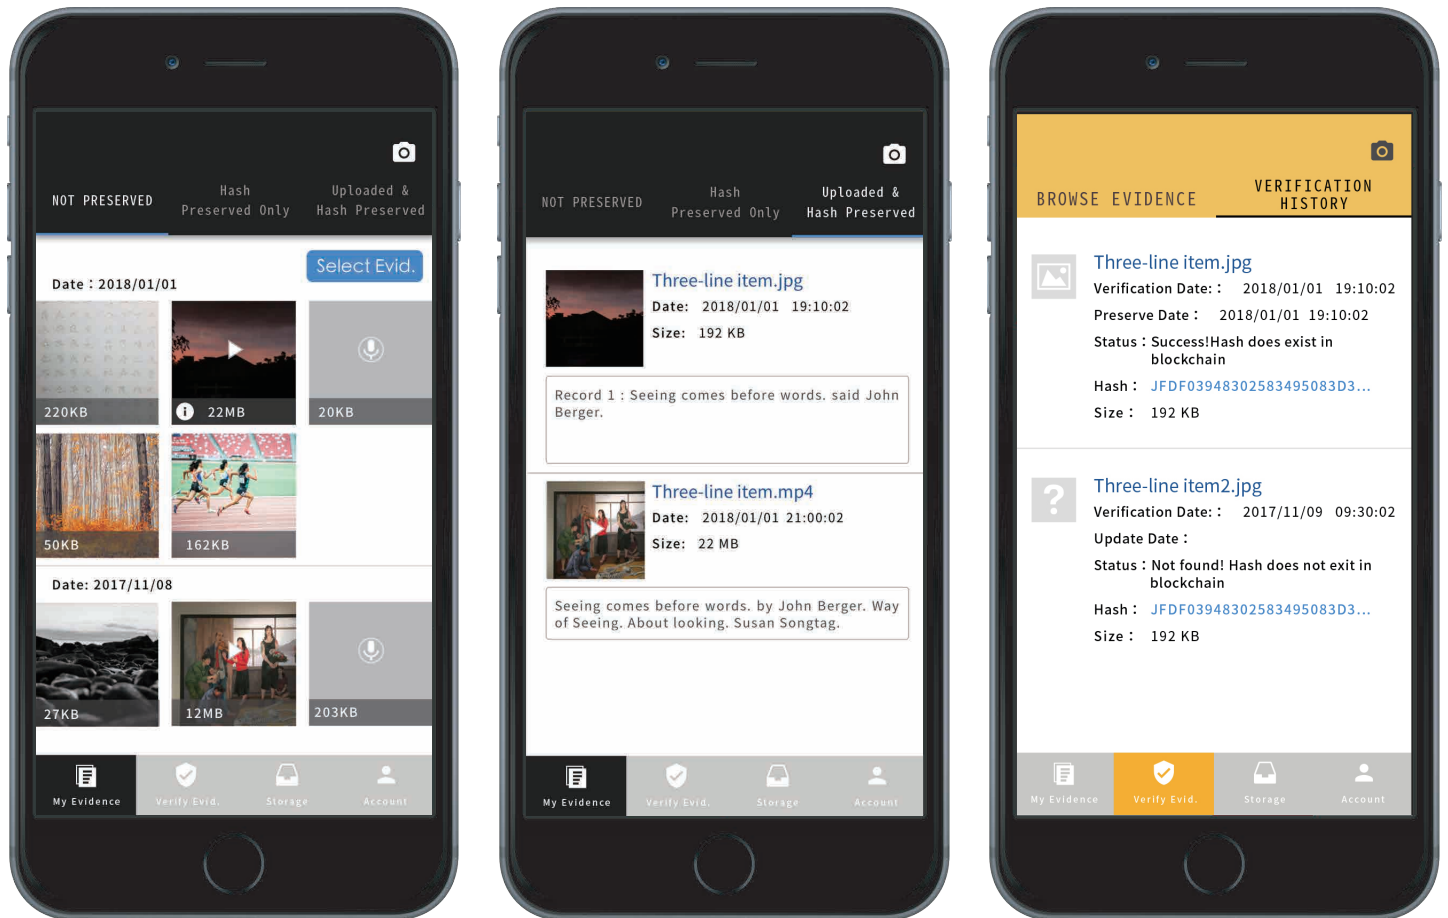

Blockchain Witness offers the following four main functions:

Photo, Video, Voice Recorder and **Screen Recorder**

all through direct use of device's built-in camera / video recorder.

Recorded evidence is complemented by a timestamp (double anti-counterfeiting patent)

User is able to upload the files' digital fingerprint (hash value) to blockchain. Through blockchain's permanent preservation feature, can ensure the integrity of evidence, thus, can significantly increase acceptance of evidence credibility by court of law.

Product Features:

- The Web Edition's management screen provides easy viewing, downloading and verification of evidence files right on your computer.
- Evidence's hash value is easily generated and can be uploaded to blockchain ensuring it's non-tampered.
- For confidentiality concerns, user can only upload files' digital fingerprints; evidence files themselves can be exported to album.
- User can always opt to upload the evidence files to the cloud to avoid losing or corrupting the original file.
- The files' digital fingerprint can further be verified to ensure evidence is unmodified and authentic.
